Introducing Triangle Tube's innovative new warranty program

At Triangle Tube, our goal is to deliver the highest quality products to our customers throughout North America. As part of our continued commitment, we confidently introduce Triangle Tube's new industry-leading Three Point Warranty Program. To benefit from our Good, Better or Best Warranty Program, please log onto www.TriangleTube.com for easy registration.

This is our ENTRY-level warranty, which offers a Lifetime Tank Warranty on all residential applications and 1-year parts with the Triangle Tube Smart 316 tank.

(Offered when your installation is NOT registered with Triangle Tube.)

*See terms and conditions.

This is our MID-level warranty which offers a Lifetime Tank Warranty on all residential applications, 1-year parts and 1-year labor allowance for replacement of the tank within the first 12 months of your installation of the Triangle Tube Smart 316 tank.

(Offered when you register the installation. Provide customer and contractor information.)

*See terms and conditions.

This is our HIGH-level warranty which offers a Lifetime Tank Warranty on all residential applications, 6-year parts and 3-year labor allowance for replacement of the tank within the first 36 months of your installation of the Triangle Tube Smart 316 tank. Your business will be added to the "find a contractor" section on the Triangle Tube website.

(Tank must be installed with a Triangle Tube boiler. Boiler and tank must be installed at the same time. Boiler and tank must be registered. Provide customer and contractor information, and upload a photo of the combustion readings from your combustion analysis on the boiler installation.) *See terms and conditions.

New, improved and smarter than ever

SMART 30 40 50 60 80 100 120

The Smart Series, Stainless Steel Indirect Water Heater, heats more hot water with less fuel for the energy conscious consumer.

With exclusive Tank-in-Tank technology and numerous upgrades, including 316L stainless steel inner tank, the Smart series delivers endless hot water with low maintenance and high reliability.

EXCLUSIVE TANK-IN-TANK TECHNOLOGY

Tank-in-Tank technology is a stainless steel hot water tank entirely immersed within an outer tank which contains the system water.

The corrugated inner stainless steel tank forms a large heat exchange surface that can heat the domestic hot water in a very short time. The outer tank is covered with a high-quality insulation, protected by a shock resistant plastic jacket.

DOMESTIC COLD INLET

AIR VENT CONNECTION

AUX CONNECTION

DOMESTIC HOT OUTLET

AQUASTAT

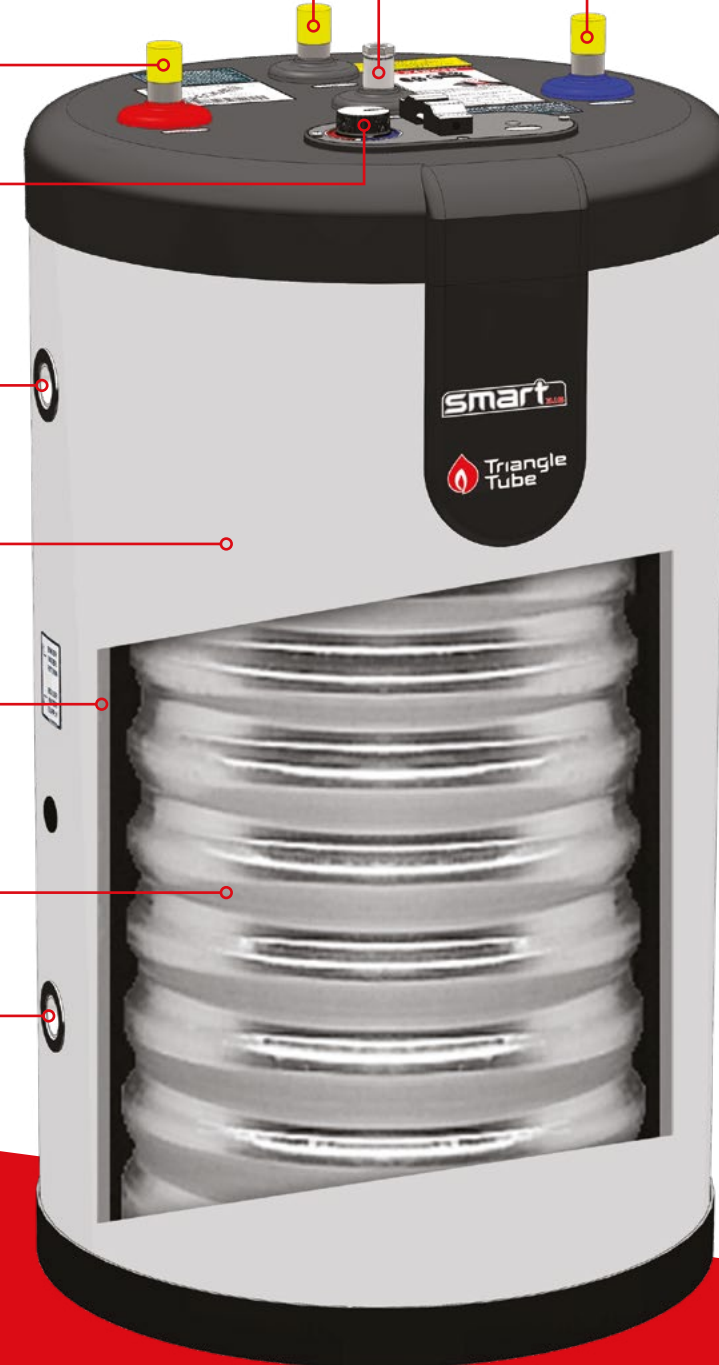

BOILER RETURN

OUTER TANK PROTECTED BY SHOCK RESISTANT PLASTIC JACKET

OPTIMAL INSULATION MADE FROM 2" POLYURETHANE FOAM

CORRUGATED INNER 316L STAINLESS STEEL TANK MAINTAINS EFFICIENCY AND LONG LIFE WITH SELF CLEANING AND SELF DE-SCALING OF THE INNER TANK

BOILER SUPPLY

Upgraded and efficient

FEATURES & BENEFITS

Upgraded stainless steel inner tank to 316L

Part of our Good, Better, Best market-leading warranty program*

Lowest pressure drop in the industry

Acid pickling for increased corrosion resistance

State of the art welding procedure for long service life

Improved dry well testing for trouble-free service life

Seven sizes to suit your customers needs

Energy efficiency

The Smart series, stainless steel indirect water heater is heated by the hot water from your boiler. As your home is being heated, your domestic hot water is being heated at the same time, thereby, consuming less fuel and conserving energy. Combine this with a recovery rate that is up to three times faster than conventional gas or electric water heaters, and The SMART Series Indirect Water Heater heats more hot water with less fuel for the energy conscious consumer.

Long term dependability

The average life span of a SMART Series Indirect Water Heater exceeds 20 years! That is two or three times the average life of a conventional gas, oil or electric water heater.

Triangle Tube offers the Smart choice in domestic hot water
